

K-7 Culture of Achievement

Roscommon Elementary and Middle School's main focus is on the cultivation of a culture of achievement through the alignment of academics with our school culture.

The culture is being purposely developed through

- True Success
- Celebrations of learning
- Community partnerships
- School-wide norms for learning

that closely align with our mission and vision to be a destination district. Thus, further engaging each student in a world-class educational experience.

Our Vision

Roscommon Area Public Schools will serve as a destination district, and we will collaborate with our community to be leaders in Education. Our vision guides our Strategic Plan which was put into place in 2012 and is our guide into the future.

Our Mission

To educate, challenge, and inspire all students to become lifelong learners that are well prepared for our global society. Our mission is the heart of our Strategic Plan that continuously demands excellence.

K-7 Education at RAPS

Roscommon Area Public Schools provides a model K-7 educational experience. Students begin their education in Kindergarten through third grade at Roscommon Elementary, while Roscommon Middle provides a continuum of education to the fourth through seventh grades during their middle years. Roscommon Area Public Schools believes in the importance of an exceptional early academic foundation at the Elementary School level.

Academic skills, social skills and work habits are formed early, so the foundational years are critical. Upper Middle School students are our leadership. They assume responsibilities through Student Council, athletics and the arts. They serve as role models for the younger students.
